Start the day your way

- Wake up to your iPod/ iPhone music or radio tunes
- Dual alarm to wake you and your partner at different times
- Gentle wake for a pleasant wake up experience

PHILIPS
sense and simplicity

Highlights

Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimize the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by resonating the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a whole new dimension of deep bass.

Dock iPod/iPhone in its case

Smartly designed spring-loaded docking port effortlessly accommodates any iPod or iPhone, without special adaptors. What's more, it

works even when most protective cases are on – just dock your iPod or iPhone as it is. Now you can truly have fuss-free enjoyment of your music.

FM digital tuning with presets

Digital FM radio offers you additional music options to your music collection on your Philips audio system. Simply tune into the station that you want to preset, press and hold the preset button to memorize the frequency. With preset radio stations that can be stored, you can quickly access your favorite radio station without having to manually tune the frequencies each time.

Free HomeStudio app

There's no better way to wake up or listen to the radio than with the free Philips

HomeStudio app. Simply download the app from the Apple App Store to enjoy a host of exciting features. Advanced alarm set up, for example, gives you greater flexibility in alarm settings - including alarm volume, duration, date and sound. You also get better user interface when you listen to the radio, with easy-to-use station preset functions.

Adjustable alarm volume

Philips clock radios let you rise and shine the way you want to. An adjustable alarm volume allows you to set the loudness of your wake up call to your fancy. Whether you need a louder alarm to get out of bed on time, or prefer a softer alarm for gentle rousing, the adjustable volume gives you the flexibility to start the day your way.

Specifications
